

# CERTIFICATE

Permission to use the test mark

***“Effectively reduces  
fine dust, bacteria, mold and viruses in indoor air”***

The  
gui-lab Engineering Company Dr. Winkens  
hereby confirms that the air purifier product group

## Lux Aeroguard

[Products: Aeroguard S, Aeroguard Sense]

conforms to the requirements of the gui-lab quality mark.

This particularly confirms the high retention efficiency of the used HEPA filter against the smallest particles such as fine dust, bacteria, molds and viruses. The viruses are primarily those that are transmitted via droplet infection (e.g. SARS-CoV-2).

## Lux International AG

is therefore granted the right to use the test mark shown below  
in connection with the above-mentioned products.

Moenchengladbach, July 29<sup>th</sup> 2020
