

CERTIFICATE

Permission to use the test mark

***“Effectively reduces
bacteria, mold and viruses in indoor air”***

The
gui-lab Engineering Company Dr. Winkens
hereby confirms that the air purifier product group

Lux Aeroguard

[Products: Aeroguard S, Aeroguard Sense]

conforms to the requirements of the gui-lab quality mark.

This particularly confirms the high retention efficiency of the used HEPA filter against the smallest particles such as bacteria, molds and viruses. The viruses are primarily those that are transmitted via droplet infection (e.g. SARS-CoV-2).

Lux International AG

is therefore granted the right to use the test mark shown below
in connection with the above-mentioned products.

Moenchengladbach, August 5th 2020
