

CERTIFICATE

Permission to use the test mark

"Effectively reduces fine dust, bacteria, mold and viruses in indoor air"

The gui-lab Engineering Company Dr. Winkens hereby confirms that the air purifier product group

Lux Aeroguard

[Products: Aerguard 4S, Aeroguard Mini]

conforms to the requirements of the gui-lab quality mark.

This particularly confirms the high retention efficiency of the used HEPA filter against the smallest particles such as fine dust, bacteria, mold and viruses. The viruses are primarily those that are transmitted via droplet infection (e.g. SARS-CoV-2).

Lux International AG

is therefore granted the right to use the test mark shown below in connection with the above-mentioned products.

Moenchengladbach, March 24th 2020 gui – lab
